OBJECTIVE

Seeking a Co-op position in Computer Engineering from May – August 2026

EDUCATION: Rochester Institute of Technology, Rochester, NY

GPA: 3.98

- Bachelor/Master of Science, Computer Engineering, December 2027
- Expected Minor: Quantum Information Science and Technology/Electrical Engineering

EXPERIENCE

Controls Engineering Intern/Research, Brookhaven National Laboratory, Upton, NY

Jun - Aug 2024

- Developed EPICS-based control drivers for the BioLogic VSP-300 potentiostat/galvanostat
- Created driver currently in use at beamlines at the NSLS II to increase experiment efficiency by entirely eliminating a manual step in the process of using the device
- Used C++, Python, and the EPICS framework to develop an efficient and consistent interface with the VSP-300

Image Sensor Characterization Intern, SRI International, Rochester, NY

May - Dec 2025

- Collected low-light image data in real-world forest conditions in order to characterize sensor performance
- Complex analysis of sensor data, including simulated annealing, with the goal of optimizing sensor SNR
- Used Verilog to design a hardware interface for extrapolating color information from a color-sparse RGBW filter

PROJECTS

Embedded Development: Tiny Chess Engine

Nov 2024

- Programmed a Chess Engine on an Arm Cortex M0+ in C to explore constrained programming
- Optimized engine to search ahead by 4 halfmoves in only 4KB of RAM with a 256 byte stack
- Implemented low-level interfaces with peripherals such as UART, PWM, LEDs, and timers

Full Stack Development: BestChoreoSoftware

Jul 2022 - Present

- Created project and data storage system backend with Java and SQL to assist in designing/learning choreography
- Implemented custom account system with SQL to allow personalization of profiles and user experience
- Designed with keyframed animation that can be synced with synthesized playback of sheet music

SKILLS

Computing: HDL Programming, UART, I2C, SPI, Memory Hierarchy, Computer Architecture, Hardware-Software Interfaces, Embedded Systems, Network Protocols and Protocol Stacks, Image Processing, Image Sensors, Robotics

Programming Languages/HDLs: Java, C/C++, C#, ARM Assembly, Python, Verilog, VHDL, Rust, SQL

Web Technologies/Languages: WebSockets, HTML, CSS, TypeScript, JavaScript, Nginx

Software: Eclipse, Vivado, ModelSim, VSCode, Keil uVision, Quartus, KiCad, LTSpice, LaTeX

Hardware: ARM, FPGAs, PCBs, Oscilloscope, Signal Generator

COURSES

Interface and Digital Electronics
Computer Architecture

Assembly & Embedded Programming
Digital Systems Design I + II

Data & Communications Networks
Circuits I + II

LEADERSHIP AND ACTIVITIES

New Student Orientation, RIT, Orientation Leader

Aug 2024

Engineering House, RIT, All Seeing Eye Project Lead

Aug 2023 - April 2026

Brick City Singers, RIT, President

Sept 2023 - Present

SPEX (Space Exploration Club), RIT, Virtual Reality Team Lead

Sept 2023 - April 2026

FRC Team 287, William Floyd High School, Programming Lead/Mentor

Sept 2019 - 2024
